

Agenda item 14.4

Current status and plans regarding
e-Learning and online training

OIML e-Learning platform

- Hardware upgrades completed following some delays due to lost equipment during COVID-19 delivery problems
- Development and production servers set up
- Consultant identified to do software upgrades in two stages
- Work has now begun
- Existing e-Learning material will be migrated to new platform

Future plans

- Collaboration has just begun with the BIPM on the development of an e-Learning package and other supporting materials. Project will be funded by Switzerland under existing arrangement with BIPM
- Existing courses available nationally or regionally can be integrated into the OIML system
- Once new OIML platform is in place, consideration will be given to new courses
- **Please make suggestions for courses**

OIML webinars - MetTalks

- Very successful webinar on new OIML G 22:2022 *Electric vehicle supply equipment* held 2022-10-07
- Recording and presentation from this webinar and the previous one on medical devices will be made available on the “Online learning” pages of the OIML website
- **Suggestions for future webinar subjects would be very welcome**
